My pet projects

Website portfolio   view website   github link

React, HTML, SCSS

This project is a personal website portfolio designed to showcase my skills, experience, and completed projects in the field of web development. The goal of the site is to provide a clear, professional, and visually engaging platform for potential employers, clients, or collaborators to learn more about my work.
The portfolio includes sections such as an introduction/about me, a gallery of selected projects, a list of technologies used, and a contact form

Employees list project   github link

JavaScript | React Class Components, HTML, CSS, Bootstrap

App created for practice react in the start my learning React using Classes. In this app you can check list of employees, filter them by name, salary, performance(having a star), mark them for performance, change their salary, add a new employee and delete employee from the list.

Todo list   github link

JavaScript | React Hooks, Redux toolkit, HTML, SCSS

This is a todo list application built to practice with Redux toolkit and showcase my front-end development skills. It allows users to add, delete, manage, and track their tasks.

Marvel project   github link

JavaScript | React Hooks, React Router, HTML, SCSS, Marvel API

App created for practice with React Hooks and work with API. In this app you can check list of all available Marvel heroes and comics, find some info about them, find a hero by name and get random hero from the list by click.
